COTTON SEED

"HUMCO" FOSTERWILT

Strain 6

★★ A New Strain

OUR Fosterwilt STRAIN 6 is descended from our Fosterwilt Strain 3. In this Strain 6 we have intensified WILT RESISTANCE—YIELDING CAPACITY and STAPLE CHARACTER through careful breeding over a period of 12 years.

We offer in this STRAIN 6 an EARLY—CLOSE-FRUITING — OPEN type cotton, with long fruiting branches and LIGHT FOLIAGE. Its yield record shows 154 lbs. of seed cotton and 54 lbs. lint per acre better than Strain 5, which means \$20 per acre HIGHER MONEY VALUE at present prices.

Its Staple Length: 1-1/16" to 1-3/32" Full.

Its Boll Size: 60 to 65 lb. (Picks easy.)

Its Lint percent: 35%.

Its Lint Character: Strong—Uniform.

PRICE: See Price List

COKER-100, Strain 8

For Non-Wilt Lands. A Superior High Yielding variety—Very Early—Thin Foliage—Open Type, with Staple from 1-1/16" Full to 1 1/8" under good conditions. It has a lint turn-out of 38% to 40%. BOLLS—round—slightly pointed—70-72 to pound—open wide and fluffy. Highly storm resistant.

IF YOU DON'T HAVE WILT AND WANT HIGH YIELD—PLANT THIS VARIETY.

PRICE: See Price List

COKER 4 IN 1

Strain 6

(Wilt Resistant)

A SAFE—HIGH YIELDING variety with STRONG WILT RESISTANCE and a PREMIUM STAPLE of 1-1/16" to 1 1/8". A Cotton that will produce HIGH DOLLAR VALUE on either Wilt or Non-Wilt Lands. It is known and grown in wide areas of the Cotton Belt.

CHARACTERS

Season: Very Early.

Foliage: Thin.

Bolls: Round ovate 65 to 70 to lb. Open wide and easy to pick.

Lint Length: 1-1/16" to 1 1/8".

Lint Percent: 36% to 38%.

Lint Character: Uniform Strong.

Plant Type: Open Growing—Spreading—Very desirable.

Production: High.

PRICE: See Price List

A WARNING!

We do not guarantee any Wilt Resistant Cotton Seed. All Wilt Cottons will die some on bad rootknot infested lands. Our Wilt Resistant Strains are as good as can be had.

TABLE COTTONS

COKER-100, WILT RESISTANT Strain 4

DESCRIPTION

In competitive tests all over the South this cotton has shown its value. It is a Wilt Resistant variety, but on both Wilt and Non-Wilt lands it has proven a very productive cotton and is perhaps the most popular general purpose cotton for all types of land.

The plant is erect, a vigorous grower, with medium size leaves giving light foliage. It is **VERY EARLY**. The Bolls are round, slightly pointed, 72 to pound seed cotton. Opens nicely. Lint percentage 37-39%. Staple length 1-1/32" to 1-1/16" with favorable conditions. Lint character uniform—strong.

PRICE: See Price List

COKER-100, WILT RESISTANT Strain 5

★★ First Year from Breeders

Perhaps no cotton combines so many good qualities as this **STRAIN 5**. It carries **ALL** the **GOOD QUALITIES** of previous Strains **PLUS HIGHER** production and slightly longer staple.

Our seed of this Strain being **FIRST YEAR** from the Breeders would naturally show a higher degree of uniformity in staple and plant characters.

Coker 100 Wilt Resistant strains have won a great many Five-Acre Contests in previous years and this Strain 5 is due to be a repeater in that regard.

IF IT'S HIGH YIELD and MONEY VALUE you want, plant this cotton and you won't go wrong.

LONG STAPLE COTTONS

DELINTED SEED

Every year more Planters recognize the value of **MACHINE DELINTED COTTONSEED**. They plant better. They come up quicker and grow off faster, insuring better stands, and therefore higher yields.

They are **DOUBLE RECLEANED** and all light seed are removed.

In the delinting process we take off two lbs. lint per bushel and give 28 lbs. of delinted seed for a bushel, or 93 lbs. of seed for 3-1/3 bushels.

We are prepared to serve these Delinted Seed at an **EXTRA COST** of 75 cents per bag or \$15.00 per ton, if your order for delinted seed is received in time for us to have this work done. We feel that the extra cleaning these delinted seed get is worth the difference in price charged for them.

WILDS STRAIN 16

DESCRIPTION

It is Very **EARLY** in blooming and maturity, with **THIN FOLIAGE**, **LARGE BOLLS** (65 to 70 per lb. seed cotton). Turns out 33% to 35% lint, with staple length of 1 1/4" to 1 3/8" Full under favorable conditions. Its staple is strong with high tensile strength and fine spinning quality. It is a very heavy producer for a long length variety. Our crop made over 500 lb. bale per acre in 1945.

The lint from this cotton sold as high as 38 cents per lb. for top grades in 1945.

Desirable type—uniformity—early maturity and high yielding capacity characterize this cotton.

PRICE: See Price List

WILDS STRAIN 17

★★ First Year from Breeders

A **LONG LENGTH COTTON**, with **HIGH PRODUCTION** and a higher **MONEY VALUE** per acre than other strains of this variety offered previously.

The **WILDS** variety has proven its adaptability over a wide area and is conceded to be the **BEST UPLAND LONG STAPLE COTTON**, with a spinning quality to its fiber that is outstanding.

CHARACTERS

Season: Extra Early Fruiting.

Plant Type: Semi-Dwarf-open-medium thin foliage.

Bolls: Large 65 to 70 to lb. Round ovate, slightly pointed. Open wide and fluffy. (Easy to pick.)

Lint Percent: 33% to 35%.

Lint Length: 1 3/8" under favorable conditions.

Lint Character: Excellent—Strong—Silky.

Production: High (exceptional for long length cotton.)

PRICE: See Price List

We Are Responsible

Our men properly supervise the growing and handling of all the seed we offer. We guarantee every seed we sell to be right, or they don't cost you a cent.

They must be pure.

They must be true to name.

They must be high quality.

They must germinate right.

Our Cottonseed are grown on our own farms or under contract for us on the farms in this section, from seed stock furnished by us. The cotton is ginned on our gins, and the seed are recleaned, sacked, stored, tested and treated by our men.

We Know What We Sell

We solicit your business on the grounds that we are prepared to serve you with **HIGH QUALITY SEED** at reasonable prices.
